

EXP_02. Set up an Azure DevOps project

AIM:

To set up an Azure DevOps project for efficient collaboration and agile work management.

STEPS:

1. Create an Azure account
2. Create the First Project in Your Organization
 - a. After the organization is set up, you'll need to create your first **project**. This is where you'll begin to manage code, pipelines, work items, and more.
 - b. On the organization's **Home page**, click on the **New Project** button.
 - c. Enter the project name, description, and visibility options:
 - Name**: Choose a name for the project (e.g., **LMS**).
 - Description**: Optionally, add a description to provide more context about the project.
 - Visibility**: Choose whether you want the project to be **Private** (accessible only to those invited) or **Public** (accessible to anyone).
 - d. Once you've filled out the details, click **Create** to set up your first project.

3. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

4. Project Dashboard

5. To manage user stories:
 - a. From the **left-hand navigation menu**, click on **Boards**. This will take you to the main **Boards** page, where you can manage work items, backlogs, and sprints.
 - b. On the **work items** page, you'll see the option to **Add a work item** at the top. Alternatively, you can find a + button or **Add New Work Item** depending on the view you're in. From the **Add a work item** dropdown, select **User Story**. This will

open a form to enter details for the new User Story.

The screenshot displays the Azure DevOps web interface for a project named 'LoanRiskAssessor'. The left-hand navigation pane includes sections for 'Boards' (Overview, Backlogs, Sprints, Queries, Delivery Plans, Analytics views) and 'Repos' (Repos, Pipelines, Test Plans, Artifacts). The 'Work items' section is currently selected. The main area shows a list of work items under the heading 'Work items'. At the top of this section are links for 'Recently updated', '+ New Work Item', 'Open in Queries', 'Column Options', 'Import Work Items', and 'Recycle Bin'. Below these links is a search bar labeled 'Filter by keyword' and several filter dropdowns: 'Types', 'Assigned to', 'States', 'Area', and 'Tags'. The work item list contains one item with the following details:

ID	Title	Assigned To	State	Area Path	Tags
1	analyze amounts	Unassigned	To Do	LoanRiskAssessor	

RESULT:

Successfully created an azure DevOps project with user story management and Agile workflow setup.
